This Conference Proceeding is brought to you for free and open access by the The (International) Association of Fish & Wildlife Agencies Conservation Collection at Digital Commons at Michigan State University College of Law. It has been accepted for inclusion in Resolutions by an authorized administrator of Digital Commons at Michigan State University College of Law. For more information, please contact domannbr@law.msu.edu.

Now, therefore, be it resolved by the International Association of Game, Fish, and Conservation Commissioners in convention assembled at Winnipeg, Manitoba, this 13th day of September, 1949, that we protest all such restrictions, urge that the control of the wildlife resources of such areas be restored to the states for public use and benefit, and that Congress enact appropriate legislation to that end if necessary.

9. **Federal Water Pollution Control Act**

Resolved by the International Association of Game, Fish and Conservation Commissioners in convention assembled at Winnipeg, Manitoba this 13th day of September, 1949, that we commend the Congress and all other agencies instrumental in securing passage of the Barkley-Taft Water Pollution Control Act; that we urge Congress to provide adequate funds necessary to implement the Act; and that we pledge the support of the association to a nation-wide program of action to make the Act effective.

10. **State Rights in Navigable Waters**

Whereas by decisions of the United States Supreme Court the jurisdiction of the states over certain navigable waters and the lands thereunder appears to have been substantially curtailed, thereby threatening the proper exercise of state authority in respect of the conservation and control of fish, wildlife, and other natural resources in and under such waters:

Therefore be it resolved by the International Association of Game, Fish & Conservation Commissioners in convention assembled at Winnipeg, Manitoba this 13th day of September, 1949, that we urge the passage by Congress of necessary legislation to clarify the limits between state and federal jurisdiction in such waters and lands and to confirm to the states full authority therein so far as necessary for proper conservation and control of the natural resources thereof for the public benefit.

11. **Federal Wildlife Regulations in National Forests and Other Public Lands**

Resolved by the International Association of Game, Fish and Conservation Commissioners in convention assembled at Winnipeg, Manitoba this 13th day of September, 1949, that we oppose the exercise of authority by any federal agency in prescribing regulations for the taking of any species of wildlife in the national forests or upon lands under the jurisdiction of the Bureau of Land Management, or the charging of any license or permit fees therefor by any federal agency. We urge the several states in which such national forests or other public lands are located to adopt and carry out all measures necessary for the proper management and control of wildlife therein and for the protection of the timber, range, and other natural resources therein against damage from wild animals, so that the exercise of federal authority therefor will be unnecessary.

12. **Recreational and Wildlife Development in National Forests**

Whereas we recognize the great value and importance to the public of the recreational and wildlife resources of the national forests of the United States, embracing over 180,000,000 acres of public land, and including some 5,000 recreational areas open to the public for hunting, fishing, camping, and related recreational uses, in charge of the U. S. Forest Service; and

Whereas previous appropriations to the U. S. Forest Service for protection and development of these resources have been utterly inadequate to meet the growing needs of maintaining the recreational areas in the National Forests and supporting necessary work in habitat and wildlife management in co-operation with respective states:

Therefore be it resolved by the International Association of Game, Fish and Conservation Commissioners in convention assembled at Winnipeg, Manitoba this 13th day of September, 1949, that we urge Congress to enact as soon as possible the measure known as S.2409, H. R. 2419, authorizing expenditure by the Secretary of Agriculture of 10 per cent of the annual receipts from the respective National Forests for the development, maintenance, and operation of recreational resources and areas, including wildlife resources, therein.

13. **Alaska Public Domain Lands**

Whereas there is pending before Congress proposed legislation designed to open up large areas of public domain land in Alaska for settlement by veterans; and
